

CLINIC PROCEDURE FOR TYPHOON + RAINSTORM WARNINGS

We are fast approaching the season for typhoons and black and red rain warnings, and have recently experienced some black and red rain warnings. Please take note of our clinic policy, as we are generally unable to contact our patients on these occasions:

Typhoon Signal 1 and 3

Our clinics will be open.

Typhoon Signal 8 or above

If hoisted 2 hours before our clinic is due to open, we will remain closed. If the signal is lowered before 1 o'clock in the afternoon, our staff will return to open the clinic (except on Saturdays).

If signal 8 is hoisted during clinic hours, we will release our staff to begin their journey home. If you have an appointment, please call the clinic before leaving home.

Amber or Red Rainstorm Warning

Our clinics will be open.

Black Rain Storm Warning

Should the warning be issued prior to clinic opening time, we will remain closed. If the signal is lowered before 1 o'clock, we will re-open (except on Saturdays). Please call first before leaving home.
